

Board Certified Behavior Analyst

We are searching for highly-motivated, experienced analysts with strong clinical and interpersonal skills. Successful candidates will have strong repertoires in the following areas: verbal behavior instruction, functional assessment, problem behavior reduction programming, and staff training/supervision.

RESPONSIBILITIES

- Provide training and supervision for a team of therapists
- Provide assessments and programming for all clients
- Supervise the implementation of verbal behavior and other skills programs
- Develop and implement trainings for staff
- Design and deliver parent training seminars as needed
- Assist with recruiting and supervising new therapists as needed

QUALIFICATIONS

- Minimum of a Masters degree
- Qualified to sit for the Behavior Analyst Certification Board or currently a BCBA
- Consultants should be able to work with children who range from high functioning to low functioning ASD and be able to develop and supervise the implementation of clinical programs in the home, school, and community environments.
- Able to work independently and as a team member in a dynamic, fast paced environment

*Some regular travel may be required in this position.
